Objective

Developed projects for diverse clients, applied research, teamwork, and problem-solving.

Continuously invest in learning and growth to stay updated in the software engineering field.

Experience

Data Governance Specialist – Ministry of Hajj & Umrah (Data Management Office) Presnt

- Contributed to the implementation of data governance initiatives aligned with national compliance frameworks (NDI).
- Participated in designing and developing digital systems for managing and tracking domains, criteria, and documents using ASP.NET, Next.js, and React.
- Structured and classified data across multiple domains and standards to enhance traceability and decision-making.
- Developed interactive dashboards using Power BI to monitor KPIs and track progress in real-time.
- Contributed to building the DMO Tracker system for managing document lifecycle, statuses, and review workflows.
- Automated document review processes, reducing manual effort and improving operational efficiency.
- Assisted in preparing and reviewing data sharing agreements in compliance with data governance policies.
- Supported data management activities including data collection, validation, and quality improvement.
- Collaborated with cross-functional teams to ensure data integration and smooth data flow across departments.
- Utilized Excel, Word, and PowerPoint for reporting, analysis, and stakeholder presentations.
- Participated in requirements analysis and delivering digital solutions supporting the organization's digital transformation.

Abadnet Institute for Training - Development Program **Jun 2025 – Oct 2025**

Full Stack Web & Mobile Development Bootcamp:

- Developed full-stack web applications using ASP.NET Core MVC and Entity Framework Core.
- Designed responsive front-end interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Built and deployed cross-platform mobile apps using Flutter integrated with Web APIs.
- Created and managed SQL Server databases, performing CRUD operations and optimizing queries.
- Applied Object-Oriented Programming (OOP) & Clean Architecture principles for structured development.
- Collaborated in building a complete E-commerce web and mobile system from backend to deployment.

Technical Skills

Backend: OOP | ASP.NET Core | Web API | MVC | .NET Framework | Laravel

AI & Machine Learning: Machine Learning Basics**|** Building & Integrating AI Models | Prompt Engineering

Databases & ORM: SQL Server | MySQL | Entity Framework

Core Concepts: Problem Solving | Data Structure | Algorithms | SOLID | Design Patterns | Agile

DevOps & Deployment: Git | GitHub | GitHub Actions | Docker | CI/CD

Programming Languages: PHP | C# | Java | Python | JavaScript **|** Dart

Mobile Development: Flutter | Firebase | REST API Integration

Soft Skills: Teamwork | Research | Time Management | Communication Skills | Presentation Skills

---

Education

Bachelor of Computer Engineering - Umm Al-Qura University **Aug 2021 – Jun 2025**

Projects

E-Commerce Web & Mobile Solution | Jun 2025 - Oct 2025

- Designed and developed a full e-commerce system as the final project of the Full Stack Bootcamp.
- Built the web version with **ASP.NET Core MVC** and **Entity Framework Core**, and the mobile app using **Flutter**.
- Implemented RESTful APIs, Firebase authentication, and SQL database integration.
- Supported product listing, shopping cart, and payment simulation..

Hajj Authentication System | Aug 2024 - Mar 2025

- Developed a Hajj Authentication System to enhance the Nusuk card by integrating a scanning mechanism at authorized bus boarding points.
- Utilized **Linux, Python, and Raspberry Pi** for system development and deployment
- Integrated **NFC** scanning to verify pilgrim permits in real-time.
- Supported efforts to preserve the safety, sanctity, and logistics of the Hajj experience.

Certificates

Mobile Application Development (Flutter) — Abadnet Institute for Training (Jun 2025 – Oct 2025)
Completed a course on Dart fundamentals, UI widgets, state management, and building cross-platform mobile apps with Flutter.

Figma UI/UX Crash Course — Udemy (Aug 2025)
Completed a crash course on Figma UI/UX, learned design principles, prototyping, and user interface best practices.

Software Development Life Cycle — Learning Space (Dec 2024)
Completed training on the SDLC, gained knowledge in software planning, development phases, testing, and deployment processes.

Learn to Build an e-commerce app with .Net Core and Angular — Udemy (Nov 2024)
Completed a practical course building an e-commerce application, learned backend development with .Net Core, frontend with Angular, and integration techniques.
